Angle brush High Finish Short 1134

Flügger Pro are handmade quality brushes for the professional painter. The brushes have an ergonomic, natural wood handle. High end fibres ensure hiding power and a perfect finish.

Product properties

Anglebrush with high finish fibre and an ergonomic short beechwood handle. Extra fine and soft brush fibres equal maximum hiding power and perfect finish. Suitable for corners, edges and hard-to-reach items. Fully vulcanised brush head and stainless steel look protect against water penetration, prevent discolouration and provide long life.

- **Extra fine and soft brush fibres**
- **Short, sanded, beechwood handle.**
- **Angle brush**

Product use

Painting of mouldings, radiators, pipes, furniture and fixtures. Rinse the brush in water before use and work thoroughly into the paint. Store the brush in airtight packaging when not in use and avoid storing the brush in water.

Cleaning and Maintenance

Clean brushes using water, alternatively Fluren 59 Brush cleaner, Fluren 37 Basic cleaner or liquid soap. For non-aqueous paints, mineral turpentine can be used instead.

Useful Information

Disposal: Remove as much paint as possible from brushes before they are disposed of as small combustible waste.

Good practice

Remove as much paint as possible from tools before cleaning. Paint and cleaning fluid must not be poured down drains, but collected and disposed of as environmental waste. Clean the paint residue from the brushes right up under the ferrule. Paint residue under the ferrule and between fibres will coagulate and result in brittle bristles. Avoid loading the brushes during drying and store the brush dry.

Please note!

Avoid using High Finish brushes for rough, structured surfaces as this will shorten the life of the brush.

Technical Data

Product Type	Brushes
Brush	Synthetic
Shaft	Beechwood
Available Sizes	15 mm; 25 mm; 35 mm; 50 mm
Metal type	Stainless steel
