Pro Series Window Scraper

Pro Series is developed for daily professional use, where reliability, durability and efficiency are essential. The series combines high functionality with robust materials and contributes to consistent results day after day.

Product properties

Window scraper for removing paint, tape, labels and adhering residue from smooth surfaces. The 80 mm wide carbon steel blade provides a consistent scraping width and can be replaced when worn. The scraper is supplied with a safety cap to protect the blade during storage.

- **80 mm scraping width**
- **Replaceable carbon steel blade**
- **Supplied with safety cap**

Product use

For removing paint, labels, tape and similar residue from glass, tiles and other hard, smooth surfaces.

Cleaning and Maintenance

Remove residue from the blade and handle after use. Dry the scraper thoroughly before storage.

Good practice

Hold the blade at a low angle to the surface and use controlled movements to reduce the risk of scratching.

Please note!

The blade is extremely sharp. Store with the safety cap fitted and keep out of reach of children. Check the resistance of the surface before use.

Supplementary Info

Sort metal, plastic and packaging components in accordance with local waste regulations. Dispose of used blades safely to ensure that the cutting edge does not present a hazard.

Country of Origin

Denmark
