Pro series Scrubbing and Oiling Tool

Pro Series is developed for daily professional use, where reliability, durability and efficiency are essential. The series combines high functionality with robust materials and contributes to consistent results day after day.

Product properties

Application tool for treating and maintaining outdoor wooden terraces with wood oil. The wide fabric pad distributes the oil across the wooden surface, while the articulated head follows the direction of application. The handle provides a stable grip and contributes to even application.

- **Wide application surface**
- **Articulated application head**
- **Even distribution of wood oil**

Product use

For applying wood oil to outdoor wooden terraces, decks and similar flat wooden surfaces.

Cleaning and Maintenance

Remove excess oil from the application pad immediately after use. Clean the tool with the cleaning agent specified for the wood oil being used.

Good practice

Apply the oil in the direction of the wood grain and work systematically in small sections to avoid overlaps and uneven treatment.

Please note!

Always follow the instructions for the wood oil being used. Test the product on a small, inconspicuous area before treating the entire surface. Oil-soaked cloths and application pads may self-ignite and must be handled in accordance with the instructions for the wood oil being used.

Supplementary Info

Remove oil residue before disposal. Sort plastic components and the fabric pad in accordance with local waste regulations.
