

Window Putty

Product properties

Type: Window putty, oil-based Flügger Window putty is an oil-based putty with ready-to-use texture. Must be painted after drying.

Product use

Use indoors and outdoors for puttying of windows and filling of minor holes in woodwork.

Adheres to glass, paint, wood stain and all surfaces, which do not come off.

The surface must be clean, dry, solid and free from dust, grease and oil.

Application with mastic gun. Smooth with putty knife.

Surplus putty must be removed immediately with knife or filler knife.

Must be coated after drying. Paint the putty as well as 1-2 mm of the glass.

Storage: Tightly closed

Supplementary Info

Shelf life: 24 months in unopened container.
