

Product properties

Soap based on natural oils for outdoor cleaning and care of natural wood.

- Soap with natural oils
- Cleaning and care
- For wooden terraces and garden furniture

Product use

Used for cleaning and surface treatment of all types of wood outdoors.

E.g. wooden terraces and garden furniture, both impregnated and untreated wood.

Can also be used for cleaning natural stone outdoors and wooden floors indoors.

Substrate

Must be absorbent, clean, dry, solid and suitable for surface treatment.

Must not be varnished or painted.

Treatment

Remove dirt and loose material.

If the surface is very dirty, it is advisable to clean it with a suitable cleaning agent before treating it with Wood Soap Nature.

Light-coloured woods should be cleaned with Terrace Cleaner, while dark exotic woods should be cleaned with Hardwood Cleaner.

Application

Mix 2–4 litres of Wood Soap Nature with 8 litres of cold water.

Scrub the wooden terrace with a scrubbing brush with stiff bristles.

The concentration can be increased if the wooden terrace is very dirty.

When the wooden terrace is clean, rinse it to remove all dirt.

Good practice

Check terraces regularly and remove growth immediately.

Expected result

Cleaned and saturated surface.

Cleaning and maintenance

Mix 2–4 dl of Wood Soap Nature with 10 litres of warm water for cleaning floors indoors.

Scrub the floor with a stiff brush.

The concentration can be increased if the floor is very dirty.

Once the floor is clean, wash it with clean water.

Please note!

Avoid application on sun-heated surfaces or in strong sunlight.

Carry out the treatment on a cloudy day or work in the shade so that the treatment can work optimally.

Environmental information

Empty and dry packaging is sorted as plastic.
Remove the cap before sorting the packaging for recycling.

Storage

Cool, frost free and tightly closed

Protection equipment

Protect skin and eyes from splashes with suitable clothing, gloves and glasses.
