Excellence Mottler

Excellence is the range for tasks where finish and precision are more important than anything else. The brushes are developed for controlled paint uptake and even release, so the surface appears smooth, uniform and without marks. Particularly suitable for sharp edges, details and work with high aesthetic requirements. Designed for professionals who do not compromise.

Product properties

Laying-off brush with ergonomic FSC-certified wooden handle. The extra-fine and soft bristles ensure an ultra-smooth and uniform finish. Suitable for treatment and laying-off of entire surfaces where perfection is the goal. Stainless steel ferrule ensures maximum durability.

- **Perfect laying-off without texture marks**
- **Ultra-smooth surface with minimal working**
- **Specialist tool for uncompromising finish work**

Product use

For painting of doors, door frames, baseboards, frames, casings, furniture and fixtures. Rinse the brush in water before use and work thoroughly into the paint. Store the brush in airtight packaging when not in use and avoid storing the brush in water.

Cleaning and Maintenance

Clean brushes with water, alternatively Brush cleaner, Basic cleaner or liquid soap. For non-aqueous paints, mineral turpentine can be used instead.

Useful Information

Disposal: Remove as much paint as possible from brushes before they are disposed of as small combustible waste.

Good practice

Remove as much paint as possible from tools before cleaning. Paint and cleaning fluid must not be poured down drains, but collected and disposed of as environmental waste. Clean the paint residue from the brushes right up under the ferrule. Paint residue under the ferrule and between fibres will coagulate and result in brittle bristles. Avoid loading the brushes during drying and store the brush dry.

Please note!

Use on very rough or textured surfaces may increase wear and shorten the brush’s lifespan.

Supplementary Info

FSC is the world's most ambitious global certification for responsible forestry and your safety for wood and paper from well-managed forests and other responsible sources. FSC works for both nature and human conditions in the world's forest areas. Together, we can curb climate change and secure forests full of life for future generations. Through forest certification, FSC helps to ensure good conditions for biodiversity, the aquatic environment, indigenous peoples and forest workers around the world, as well as to spread democracy and education locally. At the same time, the FSC ensures that the forest area is the same generation after generation and prevents deforestation. This means that the FSC contributes to 14 of the UN's 17 world goals and the green transition.

Country of Origin
Sweden

Technical Data

Shaft	Ergonomic wooden handle
Roller size	50mm; 100 mm; 150 mm
Metal ring	Stainless steel ferrule
