

Pro Series Lining Brush

Pro Series is developed for daily professional use, where consistent performance and durability are essential. The brushes combine efficient paint uptake with even distribution, ensuring a uniform finish. Manufactured from durable materials with a focus on ergonomics and consistent results. A reliable choice for professionals who expect dependable performance day after day.

Product properties

Professional angled lining brush for painting fine lines, precise colour separations and decorative details. Synthetic fibres with high shape retention and high paint-holding capacity ensure sharp lines and even paint release. Suitable for detailed precision work where control and accuracy are essential.

- Precise painting of fine lines
- High paint capacity and even paint release
- Sharp edges without the use of masking tape

Product use

Painting fine lines, decorative details, precise colour separations and specialist tasks with high demands for accuracy.

Cleaning and Maintenance

Clean brushes with water and mild soap.

Useful Information

Disposal: Remove as much paint as possible from brushes before they are disposed of as small combustible waste.

Good practice

Remove as much paint as possible from tools before cleaning. Paint and cleaning fluid must not be poured down drains, but collected and disposed of as environmental waste. Clean the paint residue from the brushes right up under the ferrule. Paint residue under the ferrule and between fibres will coagulate and result in brittle bristles. Avoid loading the brushes during drying and store the brush dry.

Please note!

Do not leave the brush immersed in water for extended periods.

Supplementary Info

FSC is the world's most ambitious global certification for responsible forestry and your safety for wood and paper from well-managed forests and other responsible sources. FSC works for both nature and human conditions in the world's forest areas. Together, we can curb climate change and secure forests full of life for future generations. Through forest certification, FSC helps to ensure good conditions for biodiversity, the aquatic environment, indigenous peoples and forest workers around the world, as well as to spread democracy and education locally. At the same time, the FSC ensures that the forest area is the same generation after generation and prevents deforestation. This means that the FSC contributes to 14 of the UN's 17 world goals and the green transition.
