Pro Series Steel Brush

Pro Series is developed for daily professional use, where reliability, durability and efficiency are essential. The series combines high functionality with robust materials and contributes to consistent results day after day.

Product properties

Flügger Pro Series Steel Brush 3 Rows with an ergonomic 2-component handle. The brush is suitable for manual removal of rust, paint, dirt and loose material from metal surfaces. The ergonomic grip provides comfort and control during demanding tasks. Suitable for professional cleaning and preparation of metal surfaces.

- **Effectively removes rust, paint and dirt**
- **Compact brush head provides excellent control for detail work**
- **3 rows of steel wire Ø 0.35 mm**

Product use

Used for removing rust, paint, dirt and loose material from steel, iron and other metal surfaces.

Cleaning and Maintenance

Remove loose material after use and store the brush in a dry place to extend its service life and protect the steel wires against corrosion.

Useful Information

Ø 0.35 mm, 3 rows, 14/15 wire bundles per row, bristle height 25 mm

Good practice

Apply even pressure and work in the direction of the brush length for optimal cleaning and minimal wear on the wires.

Please note!

The steel wires may scratch delicate, polished or treated surfaces. Test on a less visible area before use if necessary.

Supplementary Info

Waste disposal: Dispose of according to local waste regulations. Plastic and metal components can be separated for recycling where local schemes permit.

Country of Origin

Germany
