Useful Information

FSC is the world's most ambitious global certification for responsible forestry and your safety for wood and paper from well-managed forests and other responsible sources. FSC works for both nature and human conditions in the world's forest areas. Together, we can curb climate change and secure forests full of life for future generations. Through forest certification, FSC helps to ensure good conditions for biodiversity, the aquatic environment, indigenous peoples and forest workers around the world, as well as to spread democracy and education locally. At the same time, the FSC ensures that the forest area is the same generation after generation and prevents deforestation. This means that the FSC contributes to 14 of the UN's 17 world goals and the green transition.

Good practice

Overlap joints to achieve continuous coverage.
