Smart Series Garden Sprayer

Smart Series is the versatile choice for most common tasks. The series offers a good balance between quality, functionality and price and is suitable for both professional users and DIY users.

Product properties

Manual pressure sprayer for the even distribution of low-viscosity liquids. Pressure is built up using the hand pump, after which the liquid is dispensed through the adjustable nozzle. The sprayer has a shoulder strap and can be used for products including penetrating primer, algae remover and water.

- **3 litre container**
- **Adjustable spray nozzle**
- **Supplied with shoulder strap**

Product use

For applying suitable low-viscosity products such as penetrating primer and algae remover and for watering plants.

Cleaning and Maintenance

Empty the container after use and rinse the container, hose, tube and nozzle with a suitable cleaning agent. Pump clean water through the system until no product residue remains.

Good practice

Filter the liquid before filling if necessary to reduce the risk of blockages. Test the spray pattern on a small area and adjust the nozzle before starting work.

Please note!

Always ensure that the liquid is suitable for application with a pressure sprayer. Do not use flammable, highly corrosive or other liquids that may damage the sprayer. Release the pressure before opening, cleaning or storing the sprayer.

Supplementary Info

Do not discharge residue from penetrating primer, algae remover or cleaning liquid into drains. Dispose of product residue in accordance with the instructions for the product used. Sort plastic, rubber and metal components in accordance with local waste regulations.
