Pro Series Window Scraper Refill 5 pcs

Pro Series is developed for daily professional use, where reliability, durability and efficiency are essential. The series combines high functionality with robust materials and contributes to consistent results day after day.

Product properties

Replacement blades for an 80 mm window scraper. The blades are made from 0.20 mm carbon steel and have a sharp cutting edge on both sides. The blade can be turned over when the first edge becomes worn, allowing both cutting edges to be used.

- **Sharp on both sides**
- **0.20 mm carbon steel**
- **Five blades in a dispenser**

Product use

For replacing blades in the Flügger Pro Series Window Scraper 80 mm.

Cleaning and Maintenance

Remove adhering residue from the blade after use and store unused blades in a dry place in the dispenser.

Good practice

Turn the blade over when the first cutting edge becomes blunt and replace the blade when both edges are worn or damaged.

Please note!

The blades are extremely sharp. Store in the dispenser and keep out of reach of children. Ensure that the blade is fitted correctly before use.

Supplementary Info

Wrap used blades securely or place them in a suitable container for sharp metal objects. Sort the metal blades and plastic dispenser in accordance with local waste regulations.
