Pro Series Viscose Sponge

Pro Series is developed for daily professional use, where reliability, durability and efficiency are essential. The series combines high functionality with robust materials and contributes to consistent results day after day.

Product properties

Viscose sponge for washing and cleaning surfaces before painting. The viscose material has high liquid absorption, making the sponge suitable for washing larger surfaces. The generous size provides a good working surface and a secure grip.

- **High liquid absorption**
- **Large working surface**
- **For preparatory cleaning**

Product use

For washing walls, ceilings and other washable surfaces before painting.

Cleaning and Maintenance

Rinse the sponge thoroughly in clean water after use and allow it to dry completely before storage.

Good practice

Change the rinsing water regularly to avoid spreading dirt across the cleaned surface.

Please note!

Always ensure that the surface is resistant to water and the cleaning agent being used.

Supplementary Info

Sort the sponge and packaging in accordance with local waste regulations.

Country of Origin

Poland
